2021 PELICAN™ CASE CATALOG

Dear Pelican Customer,

Our story began in a small residential garage in Torrance, California in 1976. Almost five decades later, Pelican Products, Inc. remains the global leader in the design and manufacture of high-performance protective cases.

The first Pelican case was a first-aid kit for divers, and it was so rugged and durable that other customers began to repurpose it to protect their own valuables. This began the expansion of the Pelican product line, one high-quality case at a time.

We are now manufacturing more than 1,000 different case styles, from our classic Pelican™ Protector Case™ Brand Case and Pelican™ Storm Case™ Series lines, to our innovative Pelican™ Air cases. We also offer a wide range of interior organization solutions, including our TrekPak™ divider system, padded dividers, EZ-CLICK™ MOLLE panels, Pick N Pluck™ foam, as well as custom foam interiors that help protect and organize valuable assets.

Our vision at **Pelican is Protecting All That You Value**. All our fantastic Pelican employees are committed to this mantra, because we know that the most valuable thing ever put in a Pelican case is TRUST.

A big source of pride here at Pelican Products, Inc. is the continued support of our loyal customers. On behalf of myself and my fellow Pelican employees around the world, we thank you for your business.

Sincerely,

Phil Gyori

THE SCIENCE OF LIGHTNESS

Molded from the next generation of Pelican's lightweight HPX™ resin, a proprietary formula that rebounds without breaking, the honeycomb structural elements are actually stronger than solid polymer material.

PRESS & PULL™ LATCHES

All Pelican Air models now feature Press & Pull latches, making it easier to securely lock and open your case with a light touch.

WATERTIGHT

The secret is the tongue-and-groove fit with a polymer o-ring acting as a waterproof seal. Also, our Automatic Pressure Equalization Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is easy to open.

EASY RIDING

Stainless steel ball bearing wheels (on select cases) last longer and ride smoother. The nylon hub adjacent to the stainless steel resists heat resulting in less wear and tear on the polyurethane tire.

TESTED

The Pelican™ Air Case design is the result of multiple generations of refinement. This evolution is proven through submergence and other lab tests.

PELICAN™ PROTECTOR CASE™ SERIES

PROTECT WHAT MATTERS WITH MILITARY GRADE PROTECTION

No matter the job, the Pelican™ Protector Case™ Series is the standard in offering your equipment the protection it needs and deserves.

PELICAN™ PROTECTOR CASE™ SERIES
COLORS AVAILABLE

*Not available in all case sizes.

SOLID CONSTRUCTION

The Pelican™ Protector Case™ Brand Case uses an open cell core and solid wall construction, which is actually stronger and lighter than a solid core wall. Travel light with heavy protection.

DOUBLE-THROW LATCHES

Double-Throw latches are smarter and easier to open: it's the classic 'C' clamp design with a secondary movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

WATERTIGHT

The secret is the tongue-and-groove fit with a polymer o-ring acting as a waterproof seal. Also, our Automatic Pressure Equalization Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is easy to open.

EASY RIDING

Stainless steel ball bearing wheels (on select cases) last longer and ride smoother. The nylon hub adjacent to the stainless steel resists heat resulting in less wear and tear on the polyurethane tire.

TESTED

The Pelican™ Case design is the result of multiple generations of refinement. This evolution is proven through submergence and other lab tests.

PRESS & PULL™ LATCHES

These smooth-opening, patented latches hold tight under pressure and impact with easy-opening performance. Tested to over 400 lbs., yet open with a simple release button.

MOLDED-IN LOCKABLE HASPS

Twin mating hasp holes on the rim of the case allow padlocks to keep your gear in and thieves out.

VORTEX® PRESSURE RELEASE VALVE

The automatic pressure release valve prevents vacuum lock, making it easy to open your case even after extreme altitude changes. The microscopic filter blocks water molecules and dust particles so your gear stays clean.

RUGGED IN-LINE WHEELS

Shielded from dust, dirt and other contaminants – ball bearing wheels provide low-friction, low-drag rolling for easy movement of heavy loads.

*Select models only.

DOUBLE-LAYER, SOFT-GRIP HANDLES

When the weather goes south you'll find a secure grip that won't slip. An in-tool vulcanizing process over-molds the grips to the polymer handle for a lifetime of dependable performance.

SMALL CASES

Perfect for small gear and instruments, with all the features found in our larger cases: strong HPX™ resin construction, Vortex™ valve, and Press & Pull™ latches.

PANEL FRAME AND BEZEL KITS

Many Pelican™ cases can be adapted for use with electronic interface panels by using a Panel Frame (Pelican™ Protector Case™ Series) or Bezel Kit (Pelican™ Storm Case™ Series) accessory. Mount most interface panels (customer supplied) flush with the rim of the Pelican™ Protector Case™ Series or desired area in a Pelican™ Storm Case™ Series, and your technology is ready to go.

A polymer o-ring seals the panel so the base of the case remains watertight, even with the lid open. The mounting bracket, fasteners and o-ring are included in the Panel Frame Kit.

LID ORGANIZERS

Made of simulated leather or ballistic nylon with nylon zippers. A wide variety of pocket sizes protect and keep your gear organized, and install easily with Velcro® strips (included).

The Pelican™ EZ-Click™ MOLLE Panel is a lid organizer system on steroids- it's a durable panel that uses twist-cam locks to detach from your Pelican™ case for a swift changeout.

ELECTRONIC INSTALLATIONS

Many Pelican™ Protector Case™ Series and Pelican™ Storm Case™ Series models allow customization for electronics. Injection molding provides a reliable, durable, ready-to-ship enclosure with consistent dimensions. The copolymer material can be machined, drilled and sanded smooth.

These properties make the Pelican™ Protector Case™ Series and Pelican™ Storm

PELI™ QUICK MOUNTS

An alternative to panel frames, Peli™ Quick Mounts attach to the inside case wall using special adhesives. An interface panel can then be mounted on top of the Peli™ Quick Mounts and secured with screws (for Pelican™ Protector Case™ Series models only).

Case™ Series suitable for use with bulkhead connectors. Attaching equipment to the interior is equally simple using common hardware such as bolts and rivets. The hardware can be made watertight by use of o-rings, rubber gaskets or silicone.

Mounting the entire case to a wall or post is a simple way to create a waterproof control box for field use.

CUSTOM LOGO SERVICES

Personalize the outside of the case with your company logo or have your name engraved on the nameplate (for Pelican™ Protector Case™ Series models only). Logos can be applied in multiple colors as a Mylar® decal (250 piece minimum) or as a vibrant fade-resistant, scratch-resistant hot-stamped ink.

NOT ALL FOAM IS EQUAL

With over 50 years of professional packaging experience, Pelican engineers utilize sophisticated engineering technology to provide a foam solution that not only serves to protect, but also creates a professional presentation that you will be proud to display.

From simple to very complex cushion designs, we know how to provide protection that will get your gear or mission critical items safely to their destination.

CUSHIONING MATERIAL

POLYURETHANE:

Commonly used, polyurethane is a softer, open cell foam. Best for lighter weight sensitive equipment such as cameras, smartphones and laptops. Available in a variety of densities.

ANTI-STATIC POLYURETHANE:

This special foam inhibits the build up of static electricity and helps dissipate any stray static charge. It is an open cell foam that is used for lightweight items such as sensitive electronic equipment, e.g. circuit boards, computer chips, etc.

POLYETHYLENE:

Polyethylene foam is a strong, non-abrasive, water-resistant and resilient closed cell foam. Due to its excellent vibration dampening and insulation properties, it is often used for packaging fragile goods such as communications equipment, power supplies, etc. Available in a variety of densities.

ANTI-STATIC POLYETHYLENE:

Commonly used for shipping electronic parts, circuit boards and computer chips, anti-static polyethylene foam is a strong, non-abrasive, water-resistant and resilient closed cell foam. The properties of the foam slowly dissipate electrostatic charges given off by other components. Used for shock absorption, it is often used for packaging fragile goods due to its excellent vibration dampening and insulation properties.

CROSS-LINK:

Is a non-porous, non-particulate closed cell foam that is often used in a clean room environment (reduces foreign object debris – FOD). It is aesthetically pleasing and resistant to grease, dirt and water. Available in a variety of densities.

ADDITIONAL FOAM TYPES ARE AVAILABLE: FLAME-RETARDANT, CONDUCTIVE, EXPANDED FOAMS...

CUSTOM FOAM APPLICATION EXAMPLES:

- Consumer Products
- Firearms
- Computers
- Calibrated Optics
- Tools
- Video Equipment
- Bottles
- Paintings
- Musical Instruments
- Collectibles
- Any Item That You Value and Need To Protect

BEYOND FOAM

When foam is not appropriate, Pelican specializes in custom metal work to help keep your equipment secure and stable, to arrive without a scratch.

LAB TESTING

Military and OEM customers may need to certify the case will perform to specific requirements. Under precise control conditions we subject our cases to a battery of rigorous lab tests including drop, vibration, leak, heat and dust tests.

DECK MOUNT SUSPENSION SYSTEM

While foam is generally the first choice for protection, heavy or extremely fragile equipment sometimes requires fabrication of custom deck mount suspension systems to secure equipment. Cradle mounts are also the choice when the equipment can only be supported in precise locations. Pelican's machine shop is world-class, with plasma cutters, certified welders and finishing services demanded by the aerospace, defense and medical industries.

VIBRATION CONTROL

Small but constant vibration during transport is very destructive to the equipment inside a case. Pelican uses elastomer shock mounts, cable shock isolators, hard mounts, and foam that isolate the payload from case walls. Specialized foams can also mitigate vibration; our engineers understand the properties of foam to specify the type that is right for your requirements.

GET 20% TOUGHER AND HUNDREDS OF ADDITIONAL SIZE OPTIONS: ROTATIONALLY MOLDED CASES

Our rotationally molded cases begin as resin powder, measured and loaded into a mold attached to a biaxial arm. As the mold rotates and heats up, the resin coats the inside of the mold and creates the case. As a result of this process, 20% more resin accumulates in the corners and edges where it is needed most to provide impact resistance. This ensures that your case holds up

against extreme drops and impacts.

Each case is made in the USA and all cases are manufactured to MIL810 spec standards. We have 354 cases sizes combined with 7 different style options that allows us to offer the customer 620 configurable cases styles that satisfy any type of technical packaging requirements..

See pelican.com for all case styles and sizes.
